

## External Swage Notched Stems and Ferrules

- When used with an appropriate notched ferrule, these fittings can be swaged or crimped onto hose, thereby providing improved shank retention.  
*For hose OD's of 2-4/64" and below, these couplings are to be crimped only.*  
*For hose OD's of 2-5/64" and above, these couplings can be crimped or swaged.*
- The stem can be removed from a damaged hose by cutting away the ferrule, without necessarily damaging the fitting. *After inspection to determine its suitability for reuse, it can be reinstalled into another hose by using a new ferrule.*
- Notched stems let you use the same ferrules used with the notched (NO) cam and groove and notched turned back nipples. This lets you *maximize your inventory usage and reduce costs.*
